PROFESSIONAL SUMMARY

Business analytics professional with Big Four and international operations exposure spanning tax, logistics, automation, and management reporting. Combines structured problem solving, process mapping, stakeholder communication, market research, and rapid prototyping to turn ambiguous business questions into decision-ready analysis and executable workflows.

SKILLS

Business Analysis & Strategy: problem structuring, process mapping, operations analytics, stakeholder communication, executive reporting, KPI/reporting workflows, market & business-case analysis, GTM experimentation, cross-functional coordination

Analytics & Automation: SQL, Python, Power Automate, SharePoint, REST APIs, JSON, Git, Claude/GenAI, Model Context Protocol (MCP)

EXPERIENCE

Ernst & Young (EY) | Bengaluru, India

Advanced Analyst - Tax | Business Operations & Analytics | Jul 2025 - Present

- Standardized a compliance-tracking system across 1,000+ cross-border engagement lifecycles, creating a consistent operating view for APAC stakeholders across status, dependencies, and exceptions.
- Re-engineered the reporting cadence after independent data analysis, improving turnaround time by 10-15% and surfacing root causes and recommendations to senior management.
- Contributed to an AI-assisted onboarding workflow in Power Automate, translating repetitive engagement-setup steps into a more structured and scalable process.
- Automated document governance through SharePoint folder templates, access-provisioning rules, and client collaboration spaces, improving consistency across engagement documentation.

Universal Electro Engineering (UNEECO) | Bahrain

Logistics & MIS Intern | May 2024 - Jul 2024

- Analyzed 10 years of consumer and operational data to identify recurring patterns and support procurement process design and management reporting.
- Built a weekly shipment-review cadence across 10 shipments, converting manual inspection steps into a repeatable procedure and improving procurement efficiency by 15%.
- Processed 50+ invoices and 10+ GRNs in Epicor ERP while supporting shipment, procurement, and MIS workflows across day-to-day logistics operations.

SELECTED PROJECTS

InsightWeaver AI

<https://insightweaver-ai.vercel.app>

- Built an evidence-ready analysis workspace that turns multi-source inputs into structured, decision-ready briefs with traceable evidence and concise stakeholder outputs.
- Designed the workflow around source-backed synthesis and clear evidence trails so research can be translated into faster, more defensible stakeholder decisions.

Evidence Desk - Career Switch OS

<https://evidence-desk-career-switch-2i2v0f9zc-shiz7s-projects.vercel.app/>

- Built a 4-8 week career-transition workspace that converts resumes and work artifacts into cited role assessments, ranked opportunities, weekly execution plans, and factual application material.
- Structured the product around evidence collection, gap analysis, market targeting, and proof-backed conversion tracks for Business Analyst, AI automation, and Founder's Office roles.

SpotIn - Urban Parking Intelligence Platform

<https://spotin-samarthjos-projects.vercel.app>

- Designed an interactive smart-parking concept for India's urban parking market, covering live availability, reservation flow, pricing, and the end-to-end user journey.
- Combined business-case framing with a working simulation and product prototype; deployed on Vercel with Supabase-backed interaction analytics to test product usage and support scalable city operations.

BUILDER PROGRAMS & ACHIEVEMENTS

Push to Prod - Anthropic x Elevation Capital x Peak XV | WearIRL

<https://wearirl.vercel.app/>

- Selected among 150 of 5,000+ builders and shipped WearIRL, a privacy-first agentic motion mirror for fashion discovery and virtual try-on.

Midnight Moonshot - SpacetimeDB | AfterHours

<https://afterhours-night-shift.vercel.app>

- Finished 5th and acquired 45+ users through 2 GTM campaigns in a single night, combining rapid product execution with live distribution experiments.

Herbal Harmony - Entrepreneurship Development Project | CHRIST University

<https://herbalharmony-research.netlify.app/>

- Co-developed an end-to-end business plan for a natural room-freshener venture covering market feasibility, SWOT, Porter's Five Forces, 4Ps, pricing, product-line strategy, sourcing, operations, and HR planning.
- Modeled an approximately INR 80 lakh initial investment and mapped multi-channel distribution, manufacturing flow, launch assumptions, and product pricing; presented the venture analysis in a deployed interactive case study.

EDUCATION & CERTIFICATION

CHRIST (Deemed to be University), Bengaluru | BBA - Business Analytics | Aug 2022 - May 2025 | GPA: 8.6/10

Google Data Analytics Professional Certificate
